PERSONAL PROJECTS

Wizard Form

- Developed a data input form utilizing Redux and implemented Chakra UI for enhanced user interface. The form, built with React, facilitates the storage of inputted data and includes features such as previous and next buttons. The project serves as a demonstration of proficiency in utilizing Redux, UI design, and API integration to achieve a seamless and effective user experience.

ACHIEVEMENTS

Obtained data through the Wialon API and employed it to generate a comprehensive driver performance report

Page Load State - Build a loading state for a web app.

Responsive Web App - Build an app that can load for phones, tablet, and desktop.
